Subject: isotech and NAREL files

There are 4 sub-folders that contain raw data chromatogram, COCs, calibrations, and MS printouts.

J:\ESAT Downloaded data\Dimock\IsoTech

Also, what about the RAD data...there are lots of files in there too...scanned pdf reports and EDDs.

J:\ESAT Downloaded data\Dimock\NAREL Rad Data

Would you verify the location of the files? I don't think we need to transfer that many files over to "Dimock rc" but if you could provide me with a link to the directory Fred is referring to that would ensure I grab the correct files to put on FTP site.

Sorry,

The file you uploaded was just the cover letter and analytical data for each sample (ie Form 1 for each sample). The raw data came in 108 different files. Look in the sub-folder under the Isotech folder

I need to check to make sure I provided the raw data. Here's what is on the FTP site:

Week 1, Isotech Gas Isotope data with cover letter.pdf

I thought this pdf file included both raw data and summary. Is that correct?

That is incorrect. Raw data was submitted. We do not have a copy of the method and therefore do not know how the raw data relates to the calculations and thus could not validate. Mahoney tried.

Fred,

I send confirmations on these memos and just wanted to confirm with you that the statement "No raw data was submitted." was correct (I posted the reports but maybe there was raw data that I didn't post????). I agree that data validation could not be performed so it's just the raw data piece.

Cindy
